Education

West Chester University of Pennsylvania — West Chester, PA

GPA: 3.560

Bachelor of Science, Computer Science

Expected May 2027

Computer Security Certificate (NSA/DHS, CAE-CDE Designated program)

Expected May 2027

Cloud Engineering Certificate

Expected December 2026

Skills

Programming: Python (pandas, NumPy, matplotlib), Java, C

Cloud & DevOps: AWS (SageMaker, EC2, Aurora), Docker

Security: Network traffic analysis, PCAP forensics, incident investigation, threat detection

Operating Systems: Mac, Linux

Professional: Leadership, Communication, Problem Solving, Teamwork, Adaptability

Relevant Coursework

Computer Security, Cloud Computing, Computer Networks, Applied Machine Learning, Software Engineering

Projects

ProfitMatrix — AI Profit Manager

Jan 2026 – May 2026

- Engineered a churn prediction pipeline in Python using XGBoost and scikit-learn, building snapshot-based RFM features (recency, frequency, monetary trends) to identify accounts at risk of revenue loss.
- Trained a companion XGBoost revenue regressor to produce ML-predicted revenue-at-risk per account ($\text{risk} = P(\text{churn}) \times \text{predicted revenue}$), replacing naive daily-rate extrapolation with learned patterns.
- Deployed dual-mode real-time inference on AWS SageMaker supporting raw table ingestion with feature engineering and precomputed feature rows.
- Built a business output layer translating model scores into customer segments (Grow, Defend, Retain/Fix), USD-quantified risk drivers, loyalty tiers, and priority rankings for a profit management dashboard.

Hack The Box— Hands-on Security Labs

Dec 2025 – Present

- Conduct forensic investigations using Windows Event Logs and PCAP network captures to identify security incidents.
- Analyze network traffic with Wireshark to detect indicators of compromise and potential vulnerabilities.
- Reconstruct simulated attack timelines and document findings to practice incident response and security reporting.
- Monitor simulated environments and analyze system logs to identify potential security incidents.

Experience

Presbyterian Senior Living — Doylestown, PA

Dining Room Manager / Host / Dietary Aide / Kitchen Prep

Jan 2022 – Present

- Supervise daily dining operations for 60+ residents, ensuring compliance with physician-prescribed diets.
- Train new hires, preparing them for entry-level and manager roles.
- Deliver compassionate, professional service in long-term care environments for senior residents.

Doylestown Fitness Center — Doylestown, PA

Front Desk Associate

May 2021 – Jan 2022

- Served as first point of contact for members and guests, ensuring a positive and professional experience.
- Managed membership transactions, scheduled personal training sessions, and enforced fitness center policies.
